## PERSONAL STATEMENT

Enthusiastic first-year computer science student with a strong passion for web programming. Over the past two years, I've delved into various aspects of computer science, honing my skills and knowledge in web development. My academic journey has been marked by outstanding achievements, and I bring a solid foundation in programming principles and practices.

## KEY SKILLS

- Web development:**  
Entry-level experience in Django (Python) and Spring frameworks (Java).  
Strong knowledge and practical skills in HTML, CSS, and WordPress.
- Data Science and Analytics:**  
Proficient in utilizing Python for data science applications.  
Possess foundational knowledge and familiarity with key libraries such as NumPy, Pandas, Matplotlib, and Scikit-learn.
- Databases and Back-end Development:**  
Basic knowledge of relational databases, including MySQL and PostgreSQL.  
Proficient in back-end development using Python, Java, and PHP.
- Version Control and Collaboration:**  
Proficient in using Git and GitHub for version control and collaborative development.
- Server and Cloud Services:**  
Understanding of cloud services, with a focus on AWS (Amazon Web Services).
- Communication and Interpersonal Skills:**  
Effective communicator within teams, actively contributing to project processes.
